INDESTRUCTIBLE & SUSTAINABLE

“Our mission is to create the most indestructible and sustainable boats”

Stop spending time on maintenance and start enjoying your time on the water. With our HDPE boats, you can forget about corrosion, rust, wood rot, or osmosis. Simply rinse it off, and you're good to go! Our mission is to create the most indestructible and sustainable boats.

Our secret lies in the use of HDPE (High-Density Polyethylene), a highly recyclable and virtually indestructible material that ensures our boats are built to last. And because of the long life-span and recyclability, it's really sustainable as well!

BW

Black Workboats

"We are creating a new standard in the boating industry that's focused on useability, durability and lifespan. With our trusted worldwide dealer network we conquer the boating industry."

Material

HDPE Benefits

High-Density Polyethylene (HDPE) stands out as an exceptional choice for boat construction. This thermoplastic material offers a multitude of advantages that makes it almost indestructible.

HDPE is recyclable and lasts for a very long time. Drive it on the rocks, crash it into the quay? No problem, this is because of HDPE's shock-absorbing capabilities. Instead of breaking or cracking, it absorbs the energy, and there's no structural damage!

Mission

"The worlds most indestructible and sustainable boat"

HDPE IS BUILT TO LAST

Unsinkable

HDPE is lighter than water, it will never sink.

Despite this, all our boats are equipped with multiple air chambers, making these boats 100% unsinkable.

Sustainable

HDPE is 100% recyclable, has the lowest impact on the environment to produce, doesn't need anti-fouling, and last but not least, a really long life-span. This makes our boats really sustainable.

Zero Maintenance

No more rust, corrosion, osmosis or wood rot. HDPE is here to stay!

No antifouling needed, it won't even stick!

Stop maintaining, start enjoying your time on the water!

Indestructible

No matter the circumstances, even when it's being driven on rocks or dropped from a crane, this boat remains unbreakable and undented thanks to its exceptional shock-absorbing capabilities.

Models

Our boats

With our 3 different models, there's always one that fits you!

Our range starts with the BJ 300, which is lightweight and easily manageable.

The BJ 400 model, which is suitable for everyone.

For those seeking heavier-duty tasks or more spaciousness to enjoy their day on the water, we offer the BJ 500.

BlackJon 300

BlackJon 500

BlackJon 400

**BlackJon 400/500
fishing**

We strive for perfection and simplicity, we don't stop when our boat is just fine.

That's why we include griptape on the floor and benches. Also, we integrate cleats and handles as standard.

Model

BJ 300

Blackjon 300: a lightweight and high fun-factor boat designed for exceptional experiences on the water.

Constructed with high-quality HDPE, it offers strength, durability, and resistance to the

elements. With its sleek design and spacious deck layout, the Blackjon 300 is well-suited for various boating activities such as fishing, leisure cruising, or work.

Length: 300 CM
Width: 150 CM
Weight: 90 KG
Max HP: 6

“A high fun-factor boat designed for exceptional experiences on the water”

BJ 400

Model

Blackjon 400: a multi-purpose and high-performance boat that fits everyone.

Our most sold boat, the model it all started with.

Strong and lightweight.

Due to the flat bottom, the boat is incredibly stable and perfect in shallow waters.

Length: 400 CM
Width: 150 CM
Weight: 120 KG
Max HP: 15

Model

BJ 400

& 500 Fishing series

Designed together with PRO-Fishers.

We found out that the biggest problem on small fishing boats is, where do you store your rods?

This is why we've integrated rod storage through the benches. This way you can store your rods up to 270 cm safely during driving.

Another advantage of HDPE is that it mutes noises. More fish on your rod!

Length: 400 cm
Width: 150 cm
Weight: 125 kg
Max HP: 15

"Designed together with PRO-Fishers"

“Designed for higher speeds and larger outboards”

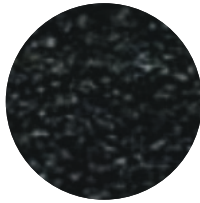

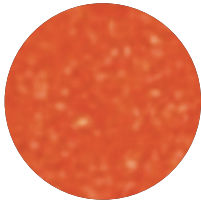

BJ 500 Model

Blackjon 500:
Heavy duty.
Designed for higher
speeds and larger
outboards.

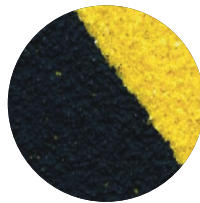

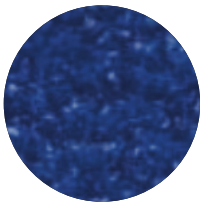

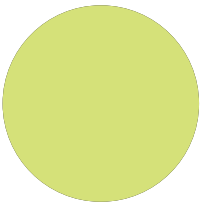

Length: 500
Width: 170
Weight: 190
Max HP: 25

Enjoy your day on the
water with this multi-
purpose boat.

Working, Fishing or Leisure,
The BJ 500 does it all.
